

Trees in Schools

Trees are a valuable green resource, offering shelter & shade, educational opportunities & landscape benefits.

Trees have an inherent risk too, so periodic tree inspections & works are advisable to maintain healthy & safe trees.

Tree Surveys & Management Plans

These demonstrate a school's efforts to minimise tree-related risks; protecting the school, children, staff, visitors & property.

Tree inspections give schools peace of mind that they have met their legal duty of care in relation to tree risk.

How Can We Help Your School?

We can help you plan ahead to control tree risk – giving your school community confidence in tree safety.

What is the process?

First we work with school managers to ensure the scope of the tree inspection meets concerns and budgets.

Our tree experts map & inspect your trees. We identify external signs of decay, damage, defects & risks. We advise on removal or reduction of hazards. Specific guidance on managing trees to enhance your school grounds is also offered.

A tree management plan comprising a tree map, tree inventory and prioritised programme of tree works will be developed for your school.

Why Enviroscope?

Enviroscope's team of professional tree experts are fully qualified & experienced. Importantly, we understand the balance between the benefits of trees & the risks trees can pose to people & property.

As a company we are fully insured. We are CHAS accredited for our health & safety standards, & all our tree experts are enhanced DBS checked to work in schools.

We have an excellent track record in helping schools across the UK manage their tree resource. Please contact us to talk about how we can help your school.

1 Tree Surveys of Cambridgeshire Schools

Working with Cambridgeshire County Council Enviroscope are inspecting trees & advising on tree risk management at 150 secondary & primary schools across the county.

As well as allowing schools to deal with tree risk in a timely way, the process offers financial benefits to schools as they are able to plan ahead & manage tree work more efficiently.

2 Tree Surveys of Nottinghamshire Schools

Enviroscope completed tree surveys of Nottinghamshire schools as part of the Priority Schools Programme. These informed the planning & design of new school buildings & outdoor facilities. We advised on practical measures to protect trees during construction, to ensure tree retention into the future. Post construction, schools have the benefit of a comprehensive tree inventory & a straightforward management plan to enable them to manage their trees efficiently.

3 Tree Surveys of Yorkshire Schools

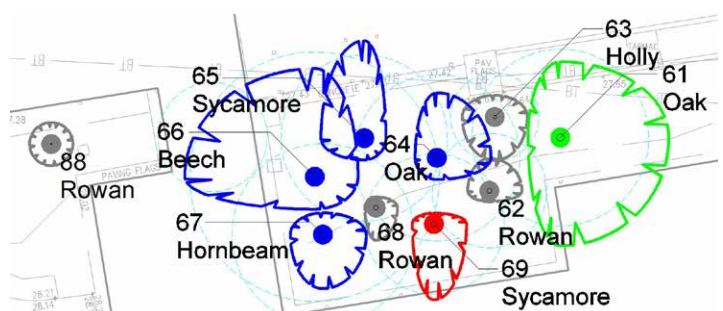

We have provided tree advice right across Yorkshire & Humberside - including to Barnsley, Kirklees, Scunthorpe, York & Harrogate primary and secondary schools. We have supported primary & secondary schools to plan new buildings, playgrounds & sporting facilities – integrating trees but not compromising on safety.

4 Tree survey for Princess Helena College, Hertfordshire

Enviroscope produced a Tree Management Plan for the extensive grounds of this independent school in Hertfordshire.

Our work included a full tree condition and safety survey plus specialist survey and advice on the school's veteran trees.

The school are now able to generate tree work schedules for the school's grounds maintenance team or contractors to implement.

5 Arboricultural Advice for a London Education Centre

We advised on how trees could be accommodated & protected as part of The Royal Parks new Isis Environmental Education Centre in Hyde Park, London. Trees have been made integral to this popular environmental education centre, which serves schools across London.
